

Test Plan – SauceDemo E-commerce Application

Prepared by:

Tariq Sayed

Release No.	Date	Author	Revision Description
1.0	26/04/2026	Tariq Sayed	Test summary

1. Objective

The objective of this test plan is to validate core functionality, usability and reliability of the SauceDemo e-commerce website through structured manual testing.

2. Scope

In Scope:

- Login functionality
- Product inventory page
- Add to/remove from cart
- Checkout process

Out of Scope:

- Payment processing (not implemented)
- Performance testing
- Security testing

3. Testing Scenarios

Login Functionality:

- Verify login with valid credentials
- Verify login with invalid credentials
- Verify login with locked_out user
- Verify login with missing username
- Verify login with missing password

Product Page:

- Verify product list is displayed correctly
- Verify sorting (A-Z and Z-A)
- Verify sorting by price (Low to High and High to Low)
- Verify sorting persists after page refresh
- Verify product images match product names

Cart Functionality:

- Verify adding product to cart
- Verify removing product from cart
- Verify cart retains items after navigation

Checkout Process:

- Verify checkout with valid information
- Verify error when fields are empty
- Verify error for invalid input (e.g. missing postcode)
- Verify order completion

4. Testing Approach

Manual testing will be performed using predefined test cases. Testing types include:

- Functional testing
- UI testing
- Exploratory testing
- Regression testing

5. Testing Environment

Application: SauceDemo

Browser: Firefox (Latest Version)

OS: Windows 10

Tools: Excel

6. Deliverables

- Test Plan
- Test Cases
- Bug Reports
- Test Summary Report

7. Entry & Exit Criteria

Entry Criteria:

- Application is accessible
- Test data is available

Exit Criteria:

- All planned test cases executed
- Defects logged and documented
- Test summary report completed

8. Defect Severity Levels

High: Critical functionality is not working (e.g. checkout failure)

Medium: Functionality works incorrectly (e.g. sorting issue)

Low: Minor UI or cosmetic issues

9. Assumptions

- Application is stable during testing
- Test data is valid and reusable

10. Risks & Mitigation

Risk: Limited test coverage → Mitigation: Focus on core user flows

Risk: Demo instability → Mitigation: Re-test and document inconsistencies

11. Schedule

Test case creation: 1 day

Test execution: 2 days

Bug reporting: Ongoing

Reporting: 1 day

12. Roles & Responsibilities

QA Tester: Responsible for test design, execution, defect logging, and reporting.

13. Traceability

Test cases are designed to cover all defined test scenarios to ensure full functional coverage

14. Test Summary

Total Test Cases: 20

Passed: 17

Failed: 3

The application performs as expected for core functionality; however, several defects were identified in product sorting and UI behaviour. These issues impact user experience but do not block core functionality.

Overall Status: Stable with minor defects
